

The management of Bleistahl North America LP has developed a corporate quality and environmental policy that meets the needs of Bleistahl North America LP and all of its interested parties. The Top Management has the responsibility for defining and documenting the BLNA Policy. Objectives for quality and environment are determined and documented in the goals & objectives through management review and approved by top management. Each department manager and process owner is responsible for ensuring the policy and objectives are communicated and understood throughout the organization. Stated below is the preservation of the environment and Quality Commitment Policy.

Environmental Protection and Quality Commitment Policy

At Bleistahl North America LP, quality and preservation of the environment is an ethical commitment that encompasses every team member of the organization with improved customer and other interested parties satisfaction and continual improvement of the Business Management System and reducing our environmental impact, as well as meet any compliance obligations, as our goal.
